

Michael Augustine

Technical Support & AI Operations Specialist

St. Louis, MO • <https://www.linkedin.com/in/michael-augustine-8926a2164/> • <https://augforce.github.io/>

PROFESSIONAL SUMMARY: Enterprise IT and AI platform professional with 15+ years of technical support, systems administration, and AI platform experience across secure cloud environments, developer-facing AI services, and internal technology workflows. Administer Microsoft Foundry end to end, including model deployments, token and quota controls, content filters, RBAC, API access, monitoring, cost controls, private networking, evaluations, and operational troubleshooting. Use Claude Code and agentic workflows to design, guide, test, document, and deploy practical internal AI tools and client automations.

- **AI Platform Operations:** Microsoft Foundry, Model Deployments, Token and Quota Controls, Content Filters, RBAC, API Access, Logging and Monitoring, Cost Controls and Model Evaluations
- **AI Tool Building & Enablement:** Claude Code, Claude Design, Anthropic API, MCP Server development, Agentic Workflow Design, AI-Assisted Testing and Validation, KB creation
- **Cloud, Data & Integrations:** Google Workspace Super Admin, Google Cloud, BigQuery, Cloudflare Pages/Functions, FastAPI, SQLite, OAuth, APIs, Secrets Management
- **Applied AI Workflows:** Internal Tools, API Proxy Orchestration, Report Generation, Security Review Automation, AI Workflow Automation

WORK EXPERIENCE

NETWORK NINJA, INC | Remote

Tech Support Engineer and AI Operations | Oct 2023 – Present

- **Technical Enablement & Operations:** Staff training, guidance, and a technical knowledge base; security reviews, operational procedures and playbooks for AI tools, Google Workspace and Apple Business (MDM) administration, and software approvals.
- **Microsoft Foundry Platform Administration:** Create developer-ready model deployments and configure token and quota controls, content filters, RBAC, API access, monitoring, cost controls, model evaluations, and incident troubleshooting.
- **Developer Enablement:** Governed model access and the operational configuration needed to build safely on Microsoft Foundry.
- **Automated Security Auditor:** Guided Claude Code-assisted development of a local Google Workspace security auditor with CLI scans, FastAPI dashboard, SQLite findings, acknowledgments, and 20 security checks.
- **User Login Auditing Tool:** Directed development of a deployed MCP login-audit tool for admin use, with Workspace audit reports, PDFs, login maps, and user lookup.
- **AI Compliance Agent:** Built and maintains an AI-assisted software review agent for third-party app requests involving HIPAA, PII/PHI, privacy, CVEs, licensing, and vendor risk.

FERGUSON FLORISSANT SCHOOL DISTRICT | Florissant, MO

Senior Technology Support Specialist | Jan 2011 – Oct 2023

- **Enterprise Scale:** Managed the lifecycle, security, and OS updates for a fleet of 1,000+ deployed Chromebooks. Windows and Mac OS support and maintenance.
- **Network Operations:** Oversaw daily server operations and network stability across multiple campus locations, providing rapid-response technical support and incident resolution across a high-volume ticketing environment.
- **Strategic Advisory:** Advised administration on emerging educational technology needs and large-scale hardware deployment strategies.
- **Staff Enablement:** Trained and onboarded staff and students on new hardware/software rollouts, driving adoption and bridging the technical gap for non-technical users.

INDEPENDENT AI SOLUTIONS BUILDER

AI Solutions Builder | February 2026 – Present

- **Serverless AI Automation:** Designed, guided, tested, and deployed a production Cloudflare Pages AI tool for a client, using Claude Code to build a lead-generation and report workflow integrating GoHighLevel, GeoNames, AstrologyAPI, Anthropic Claude, and email report exports.
- **Secure API Orchestration:** Built an AI-assisted serverless workflow where browser-facing pages call Cloudflare Functions while API keys and paid upstream services remain protected behind server-side proxy logic.
- **Cost & Risk Mitigation:** Added practical abuse and cost controls, including origin checks, per-IP rate limiting, server-side prompt construction, input validation, and client-specific voice/style rules for Claude-generated output.
- **Custom AI Workspaces:** Configure and deploy localized AI workspaces and Claude Code project environments for task-specific automation, documentation, research, and tool-building workflows.

EDUCATION

- DeVry University- BS, CIS/Computer Forensics
- Community College of the Air Force- AAS, Information Management

CERTIFICATIONS

- Claude API
- Google Generative AI Leader
- Microsoft Azure AI Engineer Associate
- Microsoft Azure AI Fundamentals
