

Michael Augustine

AI Operations & Agentic Systems Specialist

St. Louis, MO • <https://www.linkedin.com/in/michael-augustine-8926a2164/> • <https://github.com/augforce>

PROFESSIONAL SUMMARY: Enterprise IT and AI operations professional with 13+ years of experience supporting secure technology environments, cloud-based AI systems, internal tooling, and staff-facing workflows. Current work focuses on using Claude Code and agentic development workflows to design, guide, test, and deploy practical AI-assisted tools for audit, compliance, security review, software vetting, support, and client automation.

- **Core Frameworks:** Agentic Workflow Design, Model Context Protocol (MCP), Human-in-the-Loop Guardrails, Semantic RAG, Multi-Agent Review Workflows.
- **AI & Development Tools:** Claude Code, Anthropic API, AI-Assisted Testing, Custom Agentic SDLC Workflows.
- **Cloud & Systems:** Google Workspace, Google Cloud, BigQuery, Cloudflare Pages/Functions, FastAPI, SQLite, Azure/Microsoft Foundry.
- **Application Frameworks:** API Proxy Orchestration, Internal Tooling, UI Flow Validation, Report Generation, Security Review Automation.

WORK EXPERIENCE

NETWORK NINJA, INC | Remote

AI Operations and Tech Support Engineer | Oct 2023 – Present

- **Cloud AI Environments:** Support and administer secure AI and cloud-based work environments across Azure/Microsoft Foundry, Google Workspace, GCP, and related internal systems, with emphasis on access control, safe usage, and operational reliability.
- **Security Guardrails:** Help enforce AI and software-use guardrails through content filtering, access controls, rate-limit awareness, and internal review workflows.
- **Automated Security Auditor:** Guided Claude Code-assisted development of a local Google Workspace security auditor with CLI scans, FastAPI dashboard, SQLite findings, acknowledgments, and 20 security checks.
- **User Login Auditing Tool:** Directed development of an approved and deployed thinmint MCP login-audit tool for admin use, enabling conversational Workspace audit reports, PDFs, login maps, and user lookup.
- **AI Compliance Agent:** Built and maintains an AI-assisted software review agent for third-party app requests involving HIPAA, PII/PHI, privacy, CVEs, licensing, and vendor risk.
- **Tech Engineer Ops:** Creates staff guidance, technical documentation, security-review notes, and operational procedures for AI tools, Workspace administration, and software approvals.

FERGUSON FLORISSANT SCHOOL DISTRICT | Florissant, MO

Senior Technology Specialist | Jan 2011 – Oct 2023

- **Enterprise Scale:** Managed the lifecycle, security, and OS updates for a fleet of 1,000+ deployed Chromebooks.
- **Network Operations:** Oversaw daily server operations and network stability across multiple campus locations, providing rapid-response technical support.
- **Strategic Advisory:** Advised administration on emerging educational technology needs and large-scale hardware deployment strategies.
- **Staff Enablement:** Trained staff and students on new hardware/software implementations, bridging the technical gap for non-technical users.

INDEPENDENT AI SOLUTIONS BUILDER

AI Solutions Architect & Developer | February 2026 – Present

- **Serverless AI Automation:** Designed, guided, tested, and deployed a production Cloudflare Pages AI tool for a client, using Claude Code to build a lead-generation and report workflow integrating GoHighLevel, GeoNames, AstrologyAPI, Anthropic Claude, and Google Docs export.
- **Secure API Orchestration:** Built an AI-assisted serverless workflow where browser-facing pages call Cloudflare Functions while API keys and paid upstream services remain protected behind server-side proxy logic.
- **Cost & Risk Mitigation:** Added practical abuse and cost controls, including origin checks, per-IP rate limiting, server-side prompt construction, input validation, and client-specific voice/style rules for Claude-generated output.
- **Custom AI Workspaces:** Configure and deploy localized AI workspaces and Claude Code project environments for task-specific automation, documentation, research, and tool-building workflows.

EDUCATION

- DeVry University- BS, CIS/Computer Forensics
- Community College of the Air Force- AAS, Information Management

CERTIFICATIONS

- Claude API
- Google Generative AI Leader
- Microsoft Azure AI Engineer Associate
- Microsoft Azure AI Fundamentals
