

Michael Augustine

Technical Support & AI Operations Specialist

St. Louis, MO • <https://www.linkedin.com/in/michael-augustine-8926a2164/> • <https://augforce.github.io/>

PROFESSIONAL SUMMARY: Enterprise IT and AI platform professional with over a decade of technical support, systems administration, and AI platform experience. Administers Microsoft Foundry end to end, covering model deployment, access governance, cost control, RBAC/IAM/OAuth and operational troubleshooting. Uses Claude Code and agentic workflows to design, guide, test, document, and deploy practical internal AI tools and client automations.

- **Technical Support:** SaaS support, L2/L3 troubleshooting, device management, ticketing systems, Slack management, macOS/iOS, Chrome OS, and Windows support, SysAdmin
- **AI Platform Operations:** Microsoft Foundry, Model Deployments, Token and Quota Controls, Content Filters, API Access, Logging and Monitoring, Cost Controls and Model Evaluations
- **AI Tool Building & Enablement:** Claude Code, Claude Design, Anthropic API Proxy Orchestration, Python, MCP Server development, Postman, Agentic Workflows, AI-Assisted Testing and Validation
- **Cloud, Data & Integrations:** Google Workspace and GCP Super Admin, Microsoft Azure Admin, SQL, BigQuery, Cloudflare Pages/Functions, FastAPI, SQLite, OAuth, APIs, Secrets Management

WORK EXPERIENCE

NETWORK NINJA, INC | Remote

Tech Support Engineer and AI Operations | Oct 2023 – Present

- **Tech Support & Operations:** Staff training, guidance, oversees company technical knowledge base. Creates operational procedures for AI tools. Manages security tests through Vanta. Google Workspace and Apple Business (MDM) admin.
- **Microsoft Azure Administration:** Creates developer-ready model deployments in AI Foundry and configures token and quota controls, content filters, RBAC, API access, monitoring, cost controls, model evaluations, and incident troubleshooting.
- **Developer Enablement:** Governed model access and the operational configuration needed to build safely.
- **Automated Security Auditor:** Guided Claude Code-assisted development of a local Google Workspace security auditor with CLI scans, FastAPI dashboard, SQLite findings, acknowledgments, and 20+ security checks.
- **User Login Auditing Tool:** Directed development of a deployed MCP login-audit tool for admin use, with Workspace audit reports, PDFs, login maps, and user lookup.
- **AI Compliance Agent:** Built and maintains an AI-assisted software review agent for third-party app requests involving HIPAA, PII/PHI, privacy, and CVEs.

FERGUSON FLORISSANT SCHOOL DISTRICT | Florissant, MO

Senior Technology Support Specialist | Jan 2011 – Oct 2023

- **Enterprise Scale:** Managed the lifecycle, security, and OS updates for a fleet of 1,000+ deployed Chromebooks. Windows and Mac OS support and maintenance.
- **Network Operations:** Oversaw daily server operations and network stability across multiple campus locations, providing rapid-response technical support and incident resolution across a high-volume ticketing environment.
- **Strategic Advisory:** Advised administration on emerging educational technology needs and large-scale hardware deployment strategies.
- **Staff Enablement:** Trained and onboarded staff and students on new hardware/software rollouts, driving adoption and bridging the technical gap for non-technical users.

INDEPENDENT AI SOLUTIONS BUILDER

AI Solutions Builder | February 2026 – Present

- **Full-Stack AI Application Development:** Built and deployed production tools end-to-end using FastAPI, Cloud Run, SQLite/BigQuery, HTMX, and Chroma vector search, including RAG pipelines for internal knowledge retrieval.
- **API Testing & Integration:** Postman to test and validate API behavior during development alongside direct integrations with Claude API, GeoNames, and other third-party services.
- **Secure API Orchestration:** Designed server-side proxy architectures with OAuth, secrets management, cost-capped rate limiting, and input validation to protect API keys and paid services from misuse.
- **Deterministic + AI-Hybrid Systems:** Built YAML-configured, rule-based scoring engines with an optional Claude-powered analysis layer, keeping core logic testable offline while AI enhances output only when available.
- **AI Model Curation & Enablement Tooling:** Deployed a self-hosted LibreChat instance organized around model-specific strengths, removing guesswork from AI tool selection.

EDUCATION

- DeVry University- BS, CIS/Computer Forensics
- Community College of the Air Force- AAS, Information Management

CERTIFICATIONS

- Claude API
- Google Generative AI Leader
- Microsoft Azure AI Engineer Associate
- Microsoft Azure AI Fundamentals
