

Michael Augustine

Technical Support & AI Operations Specialist

St. Louis, MO • <https://www.linkedin.com/in/michael-augustine-8926a2164/> • <https://augforce.github.io/>

PROFESSIONAL SUMMARY: Enterprise IT and AI platform professional with over a decade of technical support, systems administration, and AI platform experience. Administers Microsoft Foundry end to end, covering model deployment, access governance, cost control, RBAC/IAM/OAuth and operational troubleshooting. Uses Claude Code and agentic workflows to design, guide, test, document, and deploy practical internal AI tools and client automations.

- **Technical Support:** SaaS Administration & L2/L3 Support, Systems Administration, Endpoint & Device Management (MDM/Apple Business Manager), macOS/Chrome/Windows Support, Jira/Atlassian, Slack
- **AI Platform Operations:** Microsoft Foundry, Model Deployments & Lifecycle Management, Token and Quota Controls, Content Filters, API Access, Cost Controls, Model Evaluations
- **AI Tool Building & Enablement:** Claude Code, Claude Design, Anthropic API Proxy Orchestration, LLMs, Python, MCP Server Development, Prompt Engineering, Postman, Agentic Workflows, AI-Assisted Testing and Validation (SDLC)
- **Cloud, Data & Integrations:** Google Cloud Platform, SQL, BigQuery, FastAPI, RBAC/IAM/OAuth, APIs, Secrets Management

WORK EXPERIENCE

NETWORK NINJA, INC | Remote

Tech Support Engineer and AI Operations | Oct 2023 – Present

- **IT Operations at Scale:** Closed 1,000+ requests spanning support, documentation, and identity administration, including sole administration of Google Workspace.
- **Software Governance:** Designed and runs the company software vetting program, completing nearly 400 security, HIPAA, and CVE evaluations of apps, extensions, and AI tools, feeding the approved-software list and SOC 2 (Vanta) compliance.
- **Apple Fleet Management:** Administers the Mac fleet via Apple Business Manager (procurement through offboarding) and validates every macOS release rollout.
- **Microsoft Foundry Administration:** Deploys and lifecycle-manages AI models; configures token/quota controls, content filters, RBAC, regional mirroring, and monitoring.
- **AI Enablement & Tooling:** Led company-wide Claude Code rollout and directed development of internal tools; a Google Workspace security auditor (20+ checks), a deployed MCP login-audit tool, and an AI compliance agent for third-party software review (HIPAA, PII/PHI, CVEs).

FERGUSON FLORISSANT SCHOOL DISTRICT | Florissant, MO

Senior Technology Support Specialist | Jan 2011 – Oct 2023

- **Enterprise Scale:** Managed the lifecycle, security, and OS updates for a fleet of 10,000+ district-wide deployed Chromebooks (IT asset management). Windows desktop and server support and maintenance.
- **Network Operations:** Oversaw daily server operations and network stability across multiple campus locations, providing rapid-response technical support and incident resolution across a high-volume ticketing environment.
- **Strategic Advisory:** Advised administration on emerging educational technology needs and large-scale hardware deployment strategies.
- **Staff Enablement:** Trained and onboarded staff and students on new hardware/software rollouts, driving adoption and bridging the technical gap for non-technical users.

INDEPENDENT AI SOLUTIONS BUILDER

AI Solutions Builder | February 2026 – Present

- **Full-Stack AI Application Development:** Built and deployed production tools end-to-end using FastAPI, Cloud Run, SQLite/BigQuery, HTMX, and Chroma vector search, including RAG pipelines for internal knowledge retrieval.
- **API Testing & Integration:** Postman to test and validate API behavior during development alongside direct integrations with Claude API, GeoNames, etc.
- **Secure API Orchestration:** Designed server-side proxy architectures with OAuth, secrets management, cost-capped rate limiting, and input validation to protect API keys.
- **Deterministic + AI-Hybrid Systems:** Built YAML-configured, rule-based scoring engines with an optional Claude-powered analysis layer, keeping core logic testable offline while AI enhances output only when available.
- **AI Governance Tooling:** Designed and directed the build of an MCP server security scanner, static analysis across permission scope, credential handling, injection risk, and provenance, producing a weighted, explained governance verdict, fully offline by default.

EDUCATION

- DeVry University- BS, CIS/Computer Forensics
- Community College of the Air Force- AAS, Information Management

CERTIFICATIONS

- Claude API
- Google Generative AI Leader
- Microsoft Azure AI Engineer Associate
- Microsoft Azure AI Fundamentals
